# Balancing legacy and innovation:

TAKING YOUR IBM MAINFRAME ON THE MODERNIZATION JOURNEY

CONNECTIVITY

PRODUCTIVITY

MODERNIZATION

metrixware
SYSTEMOBJECTS

Proven modernization solutions focused on your Total Cost of Ownership:

Non-intrusive
no change in source code, no component to install in the mainframe.

Seamless and gradual
isofunctional legacy applications with improved ergonomics and connectivity

Compatible with modern languages
COBOL, RPG and other legacy programming languages are no longer a constraint for developers

DevOps approach
continuous integration with testing features, better time-to-market

Open Source advocacy
integrating Open Source best practices and softwares: Eclipse, Java, Maven, Git, Jenkins…

Metrixware Systemobjects is a French Independent Software Vendor (ISV).

Since 1995, we have been developing modernization solutions to improve the connectivity of your critical business applications and the productivity of your programming tools.

Trusted around the world by major players in the bank, insurance, industries, IT and public services, we aim to offer a quick and smooth bridge between your legacy infrastructures and latest IT trends, making software developments easier for your teams.

Let's accelerate innovation and leverage the power of your IBM mainframe and mid-range systems!

Silver Business Partner

IBM.

CONNECTIVITY

Mainframe Integrator Suite

mis.metrixware.com

A mature and efficient middleware solution to connect legacy mainframe systems (IBM z/OS, IBM i, UNIX and AIX) with new technologies and use cases: Revamping, UI/UX responsive design, BYOD, mobility, SOA, REST APIs, RPA, IA bots, 3rd parties applications and services (BI, CRM, BPM...)

Application and workflow modernization

PRODUCTIVITY

Cobos

cobos.metrixware.com

An Eclipse-based SDE to modernize and improve the productivity of your application development and operations on your IBM z/OS, IBM i, UNIX and AIX mainframes. Designed as a software factory, thanks to DevOps and Open Source approach, Cobos provides efficient code modernization with tools and refactoring features.

Along with the basic functions (Editor, Navigator, Parser, Emulator), you will find innovative modules like Web Designer and Generator, and RPG Converter to adapt your legacy apps to the latest technologies.

MODERNIZATION

Rapid

Reengineering

Migration

Architecture and code transformation

Modernization projects are not a straight line as there's no one-stop shop. Balance is definitely the right word: Cost and time pressures require strategies and actions to simplify functionalities, reduce technical backlogs, replace obsolete technologies, and introduce new or modernized applications to the enterprise.

Thanks to DevOps process, Open Source tools and proprietary Rapid technology, Metrixware addresses the challenges of modernising your most critical applications on time and budget constraints.
